Portfolio:

<https://bit.ly/fireportf>

Skills

Programming languages:

Python, Dart, Go

AOS:

web backend, Machine learning

Frameworks:

Django, flutter, TensorFlow

I am a Complex problem-solver with analytical and solution-driven mindset. Dedicated to achieving development objectives according to schedules while producing impeccable code.

Furthermore, I am a customer -focused software professional with good communication skills which allows me to optimize products for consumer use. I excel as a hands-on developer and can oversee work of software teams.

Work History

Python/Data science Intern

2022 -05

Hamoye, Iyana-ipaja, Lagos

to

2022-11

- Wrote clear, clean code for various projects.
- Headed project team which consisted of various kinds of developers from data storytellers to dev ops
- Built the backend of a couple of model deployment web apps.

Self-employed: I set up a small organization which provides educational services in software development and have had to build small scale apps relevant to our activities.
